Neeraj Exim Enterprises

We source manufacturing solution
to match **your Imagination**

Cost effective Hi-precision products

We at **Neeraj Exim Enterprises**, have long been committed to serve customers with mechanical engineering products. Our company manufactures and sub-contracts following set of components catering to various industries outside India:

Sheet Metal Components, Stampings (Press Parts) and Deep Drawn Components

CNC Machined and Turned Components

Fabrication, Structural Work, Assemblies and Sub-Assemblies

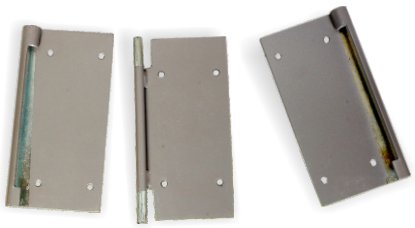
We serve Industries like Machinery Manufacturing, Pharmaceutical Equipment, Ship Instruments, Metro Trains, Scaffolding products; Automobiles body Fabrication, Furniture, Sewage treatment plants and so on.

We are located in Vadodara, Gujarat in Western India. The city, also known as Baroda, is popular all over the world for its legacy of culture, education and knowledge.

Our company **Neeraj Exim Enterprises**, was established in the year 2001, as a manufacturer of Sheet Metal Components. Over the years, we diversified into areas like Machining and Fabrication.

Over last 20 years of production, we have developed more than 3000 varieties of metallic and non-metallic components for numerous industries. We also undertake products and machinery development work, with customers' design and drawings. We have been consistently serving our esteemed customers with repeat orders over last many years.

Sheet Metal Components, Stampings (Press Parts) and Deep Drawn Components



We have access to Press shop and tool room to manufacture highly complex and intricate Press Parts and Press stampings for all applications. The Press capacities range from 5 To 200 Tons on Mechanical Presses and Hydraulic Presses. Double Action Hydraulic Presses are specially developed to meet specific requirement of Deep Drawn Parts. The tool room is equipped with EDM wire cut machine, CNC machining centers, Spark Erosion machine and a host of software facilities to design and manufacture any press tools. The technicians are highly skilled in their fields with more than 3 decades of experience.

We manufacture press parts out of any metal such as Carbon Steels, Stainless Steel, Aluminium, Brass, Copper, Monel Metal, and so on.

CNC Machined and Turned Components

We manufacture low and high volume, extremely close limit complex shapes using either the customers program or our own CAD/CAM programs.

We have a wide range of experience in working with all types of materials including; Tool steels /Mild steels, Various Stainless Steels, All grades of alloys, Precious metals, All Plastics.

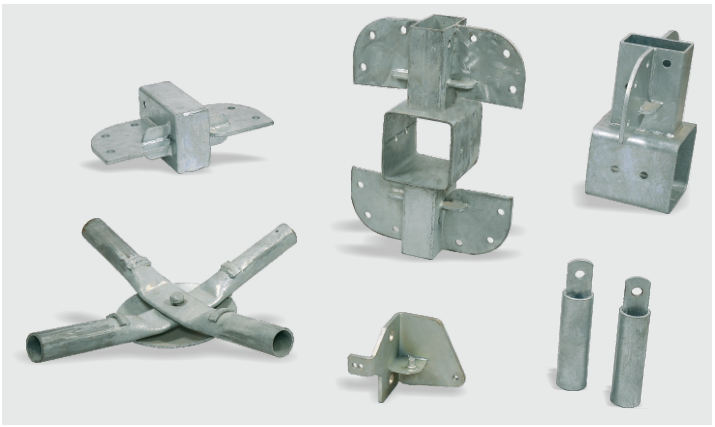
All CNC Machines are supported by the latest CAD/CAM software packages.

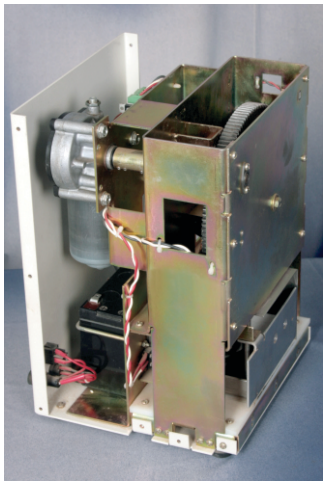
Fabrication, Structural Work, Assemblies and Sub-assemblies

We have a fabrication workshop where we combine activities to manufacture custom-made assemblies and sub-assemblies involving Sheet Metal Work, Welding, Forming, Laser Cutting, Finishes and Fitting works. This enables us to custom make components to your specifications.

We have access to tooled CNC-controlled TRUMPF presses that are directly programmed by the CAD / CAM system, ensuring accurate and highly efficient manufacturing throughout all stages of the process.

For Welding and Assembly, we make proper fixtures to ensure proper location of studs and bushes and things of similar nature. MIG, TIG and spot welding give total assembly flexibility.





Quality:

We have a proper quality system in place to ensure that at all stages of production, from raw material procurement to Packing and dispatches, strict quality control is maintained. We supply test and inspection reports with every dispatch.

Export Packing:

Packing is highly essential for safe and secure shipment of parts from our ware-house to overseas customers. During preliminary packing, we use Plastic film and corrugated boxes. Secondary packing follows using wooden Pallets and Crates. Fumigation of wooden pallets and crates is done as per statutory requirement of the destination country.

LOCATION :

We are located at Vadodara, Gujarat, India.

Vadodara is about 450 kms form Mumbai and 1030 kms from New Delhi.

By Air - It takes about 1 hour from Mumbai 1, hour 15 minutes from New Delhi.
Morning and evening flights are available both ways.

By Road - It takes about 6 to 8 hours from Mumbai

By Train - To and fro over night trains are available from Mumbai and New Delhi
